

CRAFTING THE STRUCTURES THAT SHAPE THE WORLD

NAVYA Engineering Consultants Pvt. Ltd.

Navya Engineering Consultants (NEC) specialises in providing consulting services for the construction of Communication Infrastructure, Transport, Real Estate, and Project Management in the construction industry.

We have a well-experienced design team of qualified and proficient engineers in our office to provide engineering, design management and project management services to our clients, demonstrating our unwavering commitment to their needs and expectations.

CRAFTING THE STRUCTURES THAT SHAPE THE WORLD

We have great pleasure to introduce ourselves as Civil and Structural Consultants, known as "NAVYA Engineering Consultants Private Limited" as consulting engineers.

We have a well-experienced design team of qualified Engineers in our office. We have very senior structural engineers as our advisers. We have successfully handled many projects to the entire satisfaction of our clients.

We are practicing as Consulting Structural Engineers. Our scope of service includes designing, detailing, estimating and occasional site supervision for various projects like Communication and Transmission Towers, Solar Structures, Industrial buildings, commercial and residential buildings, etc.

BUILDING EXCELLENCE

We have a wide range of experience in offering Architectural, Civil & Structural Engineering, Structural Stability, Communication and Transmission Towers, , QS & Project Management Services for many high profile engineering intensive construction Projects like High Rise Buildings, Residential Projects.

STRUCTURAL SOLUTIONS

We, NAVYA Engineering Consultants., Hyderabad, are the Consultants for Building structural design and stability, Microwave Communication Towers and have designed various types of Microwave Communication Towers both Roof Top as well as Ground Based. Our Designs are being used by various Cellular Operators in India & Overseas .

OUR SERVICES

COMMUNICATION TOWERS

- 1. Tower Design and Modelling
- 2. Soil engineering and Foundations
- 3. Access Tracks

POWER INFRASTRUCTURE

- 1. Tower Design and Modelling
- 2. Soil engineering and Foundations
- 3. Access Tracks
- 4. Solar Renewables

TRANSPORT

- 1. Roads and Bridges
- 2. Services for Rail and Metro
- 3. Hydraulics, including drainage and stormwater management

REAL ESTATE

- 1. Residential Buildings
- 2. Commercial Buildings
- 3. Industrial Buildings
- 4. Education, Healthcare and Institutional Buildings

DESIGN MANAGEMENT

- 1. Conceive projects and project scope with the clients
- 2. Provide design costs and program
- 3. Coordinate with in-house and client-nominated agencies
- 4. Oversee quality in design and ensure client satisfaction
- 5. Organise value engineering and innovation discussions with the stakeholders and clients
- 6. Ensure a smooth and transparent design delivery for the projects

COST AND PROJECT MANAGEMENT SERVICES

- 1. Feasibility Studies and Concept Development
- 2. Project Cost Estimation, preparation of BoQs and Rate Analysis
- 3. Site Engineering and Project Management
- 4. Non-Destructive Testing
- 5. Surveying

SPECIALISED SERVICES

- 1. Earthquake-resistant Designs
- 2. Wind Load Assessments and Reinforcements
- 3. Structural Assessments and Strengthening
- 4. Restoration of Cultural and Heritage Structures
